

Templates

85mm X 55mm LANDSCAPE

Flat size: 85mm x 55mm

IMPORTANT:

- Create artwork using a CMYK colour mode
- Resolution must be 300dpi
- Delete the template layer before saving your artwork

Bleed Area: The Bleed area extends out 3mm from the edge of your finished document. All images or colours that print to the edge of your document should be extended into this area to avoid any chance of any white lines appearing. Do not place any content that you wish to appear in your document in this area as it will be trimmed off.

Non Text Area: Avoid putting any text 3mm from the edge of the document. Text placed in this area will run very close to the edge of the document and could possible get trimmed off. If possible also avoid using any thin borders in this area as you may get an inconsistent thickness.

Trim Area: This is the finished size of your document. Anything placed outside of this area will be trimmed off.

STANDARD ROLLER BANNER 800MM X 2110MM

Artwork Guidelines:

Total area including bleed: 806mm (w) x 2156mm (h)
Finished size: 800mm (w) x 2150mm (h)
Visible Area: 800mm (w) x 2000mm (h)

IMPORTANT:

- Create artwork using a CMYK colour mode
- All fonts must be converted to outlines
- Resolution must be 300 dpi
- Delete the template layer before saving your artwork

Non Visible Area: This area will be hidden by the base of your Roller Banner, so make sure that you don't place any images, logos or text that needs to be seen in this area. If you're printing a block colour, we recommend extending it slightly into your non-visible area, to ensure there are no white areas visible when your Banner is extended.

Top Rail Area: This area will be hidden by the top rail of your Roller Banner, so make sure that you don't place any images, logos or text that needs to be seen in this area. We recommend that you extend your background or block colour into this area to avoid any white space.

Non Text Area: Avoid putting any text into this 5mm area. Text placed inside this area will run very close to the edge of the Roller Banner media and could possibly get trimmed off or hidden by the base. If possible also avoid using any thin borders in this area as they may appear uneven.

Bleed Area: The bleed area extends out 3mm from the edge of your finished artwork file. All images or colour that print to the edge of your Roller Banner should be extended into this area to avoid the chance of any white lines appearing. Do not place any content that you wish to appear in your document in this area as it will be trimmed off.

Trim Area: This is the finished size of your Roller Banner media. Anything placed outside of this area will be trimmed off.
